

FOR IMMEDIATE RELEASE

Inch Series Redi-Rail Product Migration

Roscoe, Illinois, USA – August 15, 2019 – PBC Linear, a Pacific Bearing Company and a global leader in linear motion solutions, will be making a slight change to all inch series Redi-Rail® carriages at the beginning of the 4th quarter of 2019 (October 1, 2019). The new inch series Redi-Rail carriages will contain mounting holes in each end of the carriage. The update to these carriages will allow for a new optional lubrication accessory that will also become available October 1, 2019. This lubrication option will be available at time of purchase, and then factory assembled to both ends. This update will have no effect on the load rating or the performance of the standard product.

Action needed: If the same part numbers are ordered as was done previously, you will receive the same product as before, but with the addition of the carriage holes. If there is a reason that your application cannot accept a Redi-Rail carriage with holes, please notify us right away at [< Email here or web page for customers to leave feedback >](#)

3 holes added at each end of carriage

Part number	Change Description	Planned change date
RRS14 (all variations)	Added holes on the end to allow for lubrication option	Q4 2019
RRS18 (all variations)		

About PBC Linear

PBC Linear has been a proud member of the Rockford area manufacturing community since 1983. The company has created and patented innovative linear motion solutions, and has greatly expanded its technology, expertise, and services to become a complete linear motion manufacturer. Through its partnerships in Europe and Asia and its worldwide network of distributors, PBC Linear has positioned itself as a trusted global leader in bearing products and linear motion technology.
