

FOR IMMEDIATE RELEASE

PBC Linear & Moons' Industries Announce Joint Venture

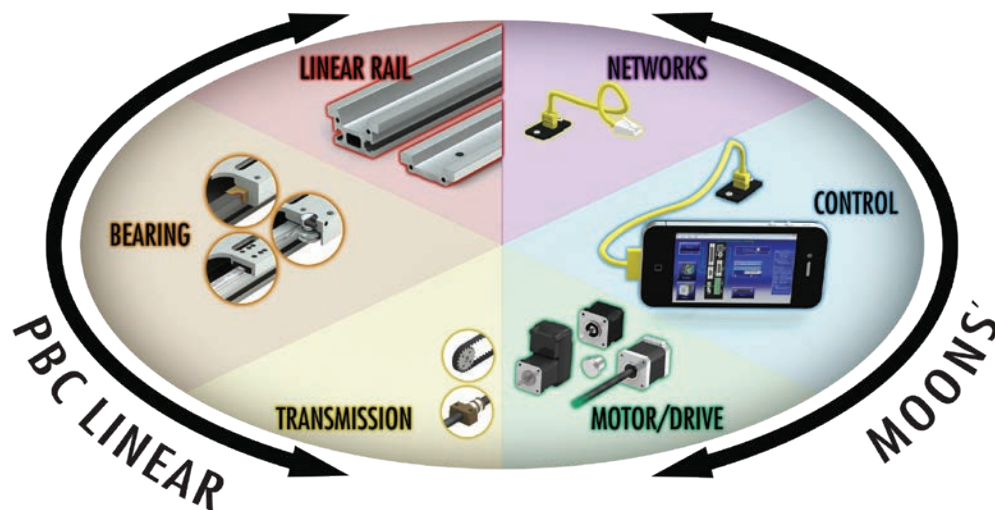

Complete Mechatronics Solutions for Linear Motion Applications

Roscoe, Illinois, USA – November 12, 2014 – At the recent CIIF Show in Shanghai, China, PBC Linear and Moons' Industries announced a joint venture together to develop and deliver integrated mechatronic solutions for linear motion applications.

For over 30 years, PBC Linear has been a world leading developer and manufacturer of linear motion solutions for a broad range of applications while developing a solid market in North America. In the last 20 years, Moons' Industries has grown to become the fourth largest stepper motor manufacturer in the world with a strong base in Asia and Europe. Combining in a joint venture, PBC & Moons' bring expertise in manufacturing precision linear rails, multiple bearing types and drive options, and creating robust linear actuators along with experience in stepper and smart stepper motors, control solutions, and network connectivity to provide a global, simplified approach to integrated mechatronics for single axis robot modules and multi-axis systems.

The PBC + Moons' combination addresses the markets merging of multiple technical disciplines, trims down and consolidates the proliferation of vendors and companies to deal with, and simplifies the complex design and architecture of a mechatronics solution.

The composite of world class linear motion from PBC and the world class motors and controls from Moons' simplifies the selection process for designers, streamlines engineering and application, and makes maintenance manageable by bringing together the pieces of mechanical, electrical, and controls to create a complete mechatronics solution for linear motion.

About Moons' Industries

For more than 20 years, Moons' Industries has provided superior motion and motion control systems to global customers through optimized product design, engineering, and manufacturing. Headquartered in Shanghai, China, Moons' global network provides solutions to Asia, Europe, and North America.

About PBC Linear

PBC Linear has been a proud member of the Rockford area manufacturing community since 1983. The company has created and patented innovative linear motion solutions, and has greatly expanded its technology, expertise, and services to become a complete linear motion manufacturer. Through its partnerships in Europe and Asia and its worldwide network of distributors, PBC Linear has positioned itself as a trusted global leader in bearing products and linear motion technology.
