

Uni-Guide - Product Migration Matrix

Released: April 20, 2012

PBC Linear provides this information to help customers deal with product life cycle management. As products mature, new products are developed, and engineering changes occur, this Product Migration Matrix will serve as a guide to help in the process of navigating from retiring components to the best engineered solution possible. If you need further assistance, please contact an Application Engineer at (800) 962-8979.

The following linear guide products are being **RETIRED** ...

Original Part Options	Suggested Migration Part Number	Change Description	Planned Retirement Date
DxxxC* and DLxxxC*	6 Standard Carriages <ul style="list-style-type: none"> • D075C • D100C • D125C • DL075C • DL100C • DL125C 	A universal carriage design that incorporates standard features (such as mounting holes for a hand brake or mounting a drive nut) has become the standard. This enables PBC to narrow stock from 32 variations to 6 standard carriages and provides customers with cost effective fast delivery.	6/30/2012
DM* or DLM*	Call PBC (800) 962-8979	All Uni-Guide rails and carriages with metric size holes and threads have been retired. They are replaced with the same external geometry of rail and carriage that utilize inch sized holes and threads.	6/30/2012
